Chapter 1: Product Overview

Thank you for choosing the Linksys Cable Modem with USB and Ethernet Connections. It allows you a fast and convenient connection to the Internet. Also, the Cable Modem works with any cable Internet Service Provider (ISP) because the Cable Modem is fully compliant with all industry standards—DOCSIS 1.0, 1.1, and 2.0.

Front Panel

Power (Green) The Power LED lights up when the Cable Modem is powered on. It is solidly lit after the self-test.

DS (Green) The DS (Downstream) LED lights up and flashes when the Cable Modem is trying to lock on a downstream signal. The LED is solidly lit when it is locked on the signal.

US (Green) The US (Upstream) LED lights up and flashes when the Cable Modem is trying to lock on an upstream signal. The LED is solidly lit when it is locked on the signal.

Online (Green) The Online LED flashes when the Cable Modem is establishing a connection to your cable ISP. It is solidly lit when the Cable Modem is synchronized with your cable ISP.

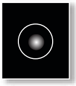

Link (Green) The Link LED lights up when the Cable Modem is connected to your computer or network through the Ethernet or USB port. It flashes when there is activity on the Ethernet or USB port.

NOTE: If the DS, US, and Online LEDs are flashing, the Cable Modem is performing a self-test.

NOTE: If the DS and US LEDs are flashing and the Online LED is not lit, the modem is still operating, but your Internet service has been disabled by your ISP. Contact your ISP for more information.

Back Panel

Power The Power port connects the Cable Modem to the power adapter.

USB The USB port connects the Cable Modem to your computer using a USB cable.

Ethernet The Ethernet port connects the Cable Modem to your wired computer or other Ethernet network device using a Category 5 (or better) Ethernet network cable.

Reset The Reset button can be used to clear the Cable Modem's connections and restore its factory default settings. Using an object with a small tip, such as a pen, press and hold the button until you feel it click.

Cable The Cable port connects the Cable Modem to the wall jack using the cable from your ISP. This is a round coaxial cable, like the one that connects to the back of your cable box or television.

Appendix A: Troubleshooting

You cannot access e-mail or the Internet.

Go through this checklist until your problem is solved:

1. Make sure all of your connections are secure.
    a. The Ethernet cable should be inserted completely into both the computer's network adapter and the Ethernet port on the back panel of the Cable Modem.
    b. If you are using the Cable Modem's USB port, check the USB connections to the Cable Modem and your computer.
    c. Check all cables between your computer and the Cable Modem for frays, breaks, or exposed wiring.
    d. Make sure your power adapter is properly plugged into both the Cable Modem and the electrical outlet or surge protector.
    e. If the Cable Modem is properly connected, the Power, DS, US, and Online LEDs on the Cable Modem should be solidly lit. The Link LED should be solidly lit or flashing.
2. Press the Reset button on the back panel of the Cable Modem. Using an object with a small tip, such as a pen, push the button until you feel it click. When the Online LED is solidly lit, try to connect to the Internet again.
3. Call your cable ISP to verify that their service is two-way. This Cable Modem is designed for use with two-way cable networks.
4. If you installed the Cable Modem using the Ethernet port, make sure the computer's network adapter is operating correctly. Make sure the adapter is listed in the Windows Device Manager and has no conflicts. For more information, refer to Windows Help.
5. Make sure TCP/IP is the default protocol used by your computer. For more information, refer to Windows Help.
6. If you are using a cable line splitter so you can connect the Cable Modem and a television at the same time, remove the splitter and reconnect your cables so that the Cable Modem is connected directly to the cable wall jack. When the Online LED is solidly lit, try to connect to the Internet again.

The Online LED never stops flashing.

Go through this checklist until your problem is solved:

1. Make sure the Cable Modem's MAC address has been registered with your cable ISP. In order for the Cable Modem to work, you must call and have the ISP activate the Cable Modem by registering its MAC address. You can find the modem MAC address on a label located on the Cable Modem's bottom panel.
2. Make sure the coaxial cable is firmly attached between the Cable Modem and the wall jack.
3. The signal from your cable company's equipment may be too weak or the cable line may not be properly attached to the Cable Modem. If the cable line is properly connected to the Cable Modem, then call your cable company to verify whether a weak signal may be the problem.

All of the LEDs on the Cable Modem indicate that the Cable Modem is functioning properly, but you still cannot access the Internet.

Go through this checklist until your problem is solved:

1. If the Power, DS, US, and Online LEDs are lit but not flashing, then the Cable Modem is operating properly. Power your computer off and back on again. This will cause your computer to re-establish communications with your cable ISP.
2. Press the Reset button on the back panel of the Cable Modem. Using an object with a small tip, such as a pen, push the button until you feel it click. When the Online LED is solidly lit, try to connect to the Internet again.
3. Make sure TCP/IP is the default protocol used by your computer. For more information, refer to Windows Help.

The power on the Cable Modem goes on and off sporadically.

You may be using the wrong power adapter. Make sure the power adapter you are using is the one included with the Cable Modem.

Suomi (Finnish) - Ympäristöä koskevia tietoja EU-alueen asiakkaille

EU-direktiivi 2002/96/EY edellyttää, että jos laitteistossa on tämä symboli itse tuotteessa ja/tai sen pakkauksessa, laitteistoa ei saa hävittää lajittelemattoman yhdyskuntajätteen mukana. Symboli merkitsee sitä, että tämä tuote on hävitettävä erillään tavallisesta kotitalousjätteestä. Sinun vastuullasi on hävittää tämä elektroniikkatuote ja muut vastaavat elektroniikkatuotteet viemällä tuote tai tuotteet viranomaisten määräämään keräyspisteeseen. Laitteiston oikea hävittäminen estää mahdolliset kielteiset vaikutukset ympäristöön ja ihmisten terveyteen. Lisätietoja vanhan laitteiston oikeasta hävitystavasta saa paikallisilta viranomaisilta, jätteenhävityspalvelusta tai siitä myymälästä, josta ostit tuotteen.
